To Whom to May Concern,

I highly recommend TYFA's very professionally presented educational program for any school wishing to better prepare its teachers regarding transgender issues. Within 1 week's time following the program presented on October 31, I saw a very definite positive response from 100% of my 15 year old transgender son's extremely supportive school staff. My son has shown a significant improvement in his ability to communicate with teachers within the past 2 weeks. His schoolwork is caught up, he has made the Honor Roll, and has shown effort in turning in his assignments instead of a lack of initiative. He seems happier, has become talkative, and most important of all, he looks into the face of the person he is speaking to. Before, he was withdrawn, with his head down, and had developed a severe social phobia of speaking or being in public.

I cannot say enough on the improvement to the quality of life that this program has given my son, who was deep in despair before they came to his school. The entire staff at the school was lost about what to do to help him. As his mother, I was stressed beyond comprehension, but now I have a circle of supportive people around me. Please do not hesitate to let TYFA help educate the educators about an issue many do not understand. With this knowledge and understanding things will improve, but sometimes you have to let others help you first before you can get there together.

**Sincerely,
Barb Morgan**
